

ABSTRACT

The invention provides a method for treating a subject suffering from an intestinal disease, including, *inter alia*, Crohn's disease, ulcerative colitis, immuno-inflammatory intestinal injury, drug-induced enteropathy and ischemia-induced intestinal injury. This invention further provides a pharmaceutical composition for treating a subject suffering from an intestinal disease, including, *inter alia*, a lipid or phospholipid moiety bonded to a physiologically acceptable monomer, dimer, oligomer, or polymer, and a pharmaceutically acceptable carrier or excipient.
